

Year 6

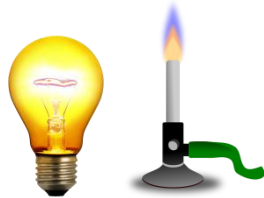

Welcome to Secondary

Hi my names Jack, I am in Maple class. I thought I would try and tell you a little bit about being in secondary.

We get to do lots of fun, exciting science experiments as we have a brilliant science room. For example, we have used Bunsen burners to make sparklers and made circuits with light bulbs.

In the playground we have a lovely gazebo that you can sit in at break and lunchtimes.

We have lots of lovely staff and students to help you settle in and find your way around.

Hope this helps make your first day a good one.
